## SUMMARY

Versatile Java Developer with experience in Spring Boot, Angular, microservices, and REST APIs. Skilled in quickly learning new technologies and delivering clean, maintainable software. Comfortable across the full development lifecycle and committed to building reliable, scalable solutions that solve real problems.

## SKILLS

**Languages:** Java, JavaScript, TypeScript, Dart, PL/SQL, HTML, CSS

**Technologies:** Spring Boot, Angular, Flutter, Oracle, Docker, Microservices, REST APIs

## EXPERIENCE

**July/2024 – Present** | **Assistant Software Engineer** | **Millennium Information Solution Ltd.**

- Working on Ababil NG, a modern core banking system used by multiple banks and financial institutions. Contributing to modules supporting Sharia-compliant accounts, deposits, trade and treasury operations, as well as multi-currency management. Implementing integrations for internet banking, mobile banking, and agent banking, enabling secure and efficient digital banking services. Ensuring high performance, scalability, and compliance with banking standards and Shariah guidelines.

```
Spring Boot  /  Angular  /  Oracle  /  Docker  /  Microservices
```

## EDUCATION

**2023** | **Professional Certificate** | **IsDB-BISEW IT Scholarship Project**
Web and Mobile App Development using Spring Boot, Android & Flutter

**2018** | **Honours** | **National University**
Islamic Studies | 3.35 out of 4.00

**2014** | **Higher Secondary Certificate (Alim)** | **Madrasah Board**
Humanities | 5.00 out of 5.00

**2012** | **Secondary School Certificate (Dakhil)** | **Madrasah Board**
Humanities | 5.00 out of 5.00

## PROJECTS

**Spring Boot, MySQL, Angular, Flutter** | **Multi-Vendor eCommerce Solution** | **Source Code | Live Preview**
A full-featured online marketplace platform enabling multiple vendors to showcase and sell products. The solution uses Spring Boot for a scalable backend, Angular for an interactive web interface, and Flutter for a seamless mobile experience.

**Android, Firebase** | **Hishab Kitab - Expense Manager** | **Download from Play Store**
A financial management app designed for effortless tracking of income and expenses, featuring multiple account support and customizable categories. It includes automatic cloud backup for secure data storage and provides detailed PDF reports for clear financial insights within a user-friendly interface.

**Spring Boot, Web Socket, Angular** | **Real-time Chat Web Application** | **Source Code | Live Preview**
A real-time chat application built with Spring Boot and Angular, leveraging WebSocket for instant messaging between users. MySQL is integrated to manage user accounts and persist chat history. The system supports user registration, one-to-one conversations, chat history management, and secure sign-out.

## LANGUAGES

**English** - good, **Bangla** - native
